

## Effect Size Level Data Extraction - Validation

Level 1: Compare AI data extraction against human data extraction

For this validation level, I will follow these steps:

- Step 1: Run a research question in MyEducationResearcher
- Step 2: Gather the list of study citations included in the final pool
- Step 3: By hand, extract effect size level data from each of the studies
- Step 4: Compare the data extracted by hand to the data extracted by MyEducationResearcher
- Step 5: Report the accuracy rate by variable, and overall
